I see where this game is trying to go, and it has potential, but the visuals let this game down a LOT. Regarding mechanics, it's also pretty easy to score goals and you can score goals on most levels with just luck rather than intuition.. This tablet port is a ripoff of an ancient iPhone App store game called "Elements" where you match up various elements to create more complex elements. For example, matching fire + water gets you steam. Most of the core gameplay elements are lifted straight from "Elements" including a large number of the matches (even obscure seeming ones), so the ripoff strenght is high.

There's probably about half an hours worth of gameplay unless you have OCD. The developers tacked on a few other "features" but ostensibly it's the same game as Elements. Also, they nag you incessantly to rate their game (not sure how that works given it's on Steam, but that doesn't stop them annoying the hell out of you anyway).

Overall, 0/10 for ripping off other peoples game ideas and cashing in on them, and 0/10 for nagging people who already bought your game (I got this in a bundle, whatever you do, don't pay full price for tablet games).. I enjoyed the game. Well worth it for the purchase price. The game needs interface improvements. There is a somewhat lack of options and in order to change resolutions you must restart the game. Your required to select a resolution size prior to launching the game. This is somewhat annoying. Considering if you don't like the selected resolution you must restart. Game interface and the level joining relatively easy no complaints. Game just needs better options.. The single player is just a bunch of bot maches with a few meh cutscenes. The world building of a world on the brink due to fuel shortages could be interesting but since you don't personaly see anyone effected by it it doesn't have much impact. i wish the worldbuilding was bigger gameplay is solid.. This game was a bit disappointing to be honest. It did have a good premise t o it however there was a complete lack of interaction with character and I mean proper interaction because sometimes no matter what you chose the outcome would be the same creating the illusion of choice and this made things very linear in the story and when dealing with characters in the story. It did have however a very interesting character build format which is unique to the game, unfortunately some of these powers and abilities you choose feel underused and pointless. Overall i'd say that its an okay game but its not great either, I'd really recommend playing other choice of game and hosted games first. If you're looking for super power based stories i could recommend The Hero Project which is a trilogy that whilst has a more limited set of powers it has a much better story with characters.. Fun for the whole family.

This game presents a classic British Whodunit. The setting, the investigators, the impeccable slightly over the top British narrator and the characters straight out of any Agatha Christie mystery (if slightly exaggerated) make this a pleasure to watch: this game has got it pinned down perfectly. Sure, you'll be solving casual puzzles (you can pass the controller around round-robin fashion for up to 4 players, the rest'll just have to spectate), but it's the Britishness, the Whodunit-ness, the mayor, the constable, the butcher, the librarian, the doctor, the miller, Lady Snobbish, the gossipy old ladies, the colonel and everyone else who bring this home.

In short, the game is 6 episodes of ~45 minutes each (that somehow add up to 6.9 hours on the account we played it on, but presumably that includes getting everyone settled on the couch etc.). If the trailer appeals to you, the game delivers exactly that in spades, at a bargain price.

Plays Multiplayer Match With Friend
Sends Scout to Friends Base
Turns Out he has 1000 jeeps at his base
i tell my scout to throw a grenade at the jeeps
Then a hear a loud BOOM!
then my game crashed

10/10 Would Crash Again. I highly recommend this, it's much better than its' successor, if you would even call it that.. This game is fine for casual fun, but it lacks the depth for any kind of extended play. For a game about constructing ships, you'll lose any real choice in the appearance of your ship as you try to squeeze as many weapons on the front of your ship as possible without obstructing their firing arcs.. I don't even know what is this or how did it end up on my library... don't waste your time.. Highly recommended for any fans of retro-style games or shooters. There are 4 different difficulty levels that each give a different experience as opposed to some games who would have included difficulty levels as an afterthought by increasing damage values or boss health. CometStriker has a TON of replay value, with a huge amount of achievements, multiple playable characters, and an in-game leaderboard to compare and compete against other players. Art and soundtrack is amazing. Solid game that is well worth a playthrough.. Great graphics, very solid controls, funny dialogues, great voice acting and really nice puzzles.

Irony Curtain: From Matryoshka with Love is easily one of the best adventure games i have played in recent memory and maybe something more than that!

I highly recommend it for adventure game fans out there. i've played it for a short time and it looks good. (or at least it looks different.) It's playable and has a lot of potential, but it's not there yet. I purchased it and i don't feel it is wasted money. It isn't as polished as wasteland 2 or x-com. but i guess that it is a matter of time before the gameplay gets better. If you like x-com, wasteland 2 and shadowrun then this one might be less good. Are you out of other games (like invisible inc.) then this is a game to try. There are bad games and this isn't a bad game. It just isn't as good as x-com. but be honest. Getting onto par with x-com is quite difficult. Seeing that they actually did a lot of overhaul before release makes me confident that they will get there. SO... do i recommend it? yes. \$20 for a game with a lot of potential is still not expensive for several hours of gameplay.. Interesting simplistic card flip game. 6 map variants from egypt to china you have the goal of identifying the object or symbol of interest and flip cards until you find its same match pair. Increase your PSI chain by flipping cards in series without fail. The game starts off simple enough asking the player to flip 2 cards with a 50% chance of said card being the image requested. This can climb to 6 cards making the chances slimmer as you play.

RNG is what drives this title. I am not aware of any means to fudge this faster. I picked this game up on sale for 0.49 USD and it offers almost 500 steam achievements for less than 2 hours of playing "guess and check" but I must admit, I had the assistance of steam user guides for tips on how to get the 444 spam achievements as soon as possible. (A hint: Stay in Egypt)

Still, for the simplicity and lack of interesting features it was a solid 100% for the profile. It is what it is, a shameless get.. Honestly this was an enjoyable game multiplayer was a bit dry because there was not that many players (I came late to the party) but never the less it was a very fun game to play storyline I give it an ok.

This game is like battlefields ugly twin sister, you would hit that but only with a paper bag.

Story-7/10
Multiplayer-8.5/10
Final verdict 7/10

Buy on sale if you want to enjoy it but not like you regret hitting the ugly sister

also it takes 14 hours to beat the main mission. At first, I was excited about a puzzle game with RPG elements (I love RPGs), but it really doesn't add anything to a puzzle game, at least not this one. I played Puzzle Quest and a couple of other similar games that had a better RPG system than this game. Bejeweled is better than this thing.
